AI THRIVES ON WHOLE DATA

Key Executives

Atanas Kiryakov
President

Vasil Momtchev
Senior Vice President Products
& Engineering

Andreas Blumauer
Senior Vice President of Growth

Todd Blaschka
Senior Vice President of Sales

Martin Kaltenboeck
Senior Vice President
of Customer Success

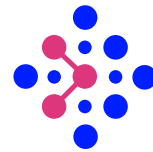

Veska Davidova
Senior Vice President Finance &
Compliance

Strategic Positioning

- Graphwise is positioned as a leading player in the graph technology space, ranking among the top three globally. It offers a cutting-edge knowledge graph platform and demonstrates strong R&D capabilities in graph and AI innovation, providing end-to-end solutions for clients worldwide.
- With two frequently used platforms (Poolparty and GraphDB), more than 200 customers leverage these integrated systems to solve complex data management challenges. Together, these platforms form the most comprehensive GraphAI solution on the market.
- Graphwise will continue to focus on developing innovative AI applications across various industries, including healthcare, finance, and manufacturing.

Market Demand

- The global demand for knowledge graphs is rapidly increasing, driven by their role as essential components for Generative AI (GenAI) applications and their use in building enterprise-wide semantic layers. These layers support search, analytics, and discovery solutions, making them vital for modern businesses.
- Combining expertise from Ontotext and Semantic Web Company, Graphwise is uniquely positioned to lead advancements in the Graph RAG (Retrieval-Augmented Generation) space. Customers gain access to a comprehensive graph platform that supports high-performance AI-driven data integration and analytics.
- The larger, more robust company ensures greater scalability and enhanced AI capabilities, enabling profound insights, process automation, and improved decision-making. This growth also offers customers and partners increased security, critical for strategic, long-term investments.

GRAPHWISE

AI THRIVES ON WHOLE DATA

Essential Products

GraphDB

a GRAPHWISE product

a graph database engine that provides a robust framework for data integration, linking, reuse, and analysis, offering a trusted corpus of information in the form of a Knowledge graph, essential for ensuring the accuracy and reliability to overcome hallucinations of large language models, and enhance natural language generation.

PoolParty

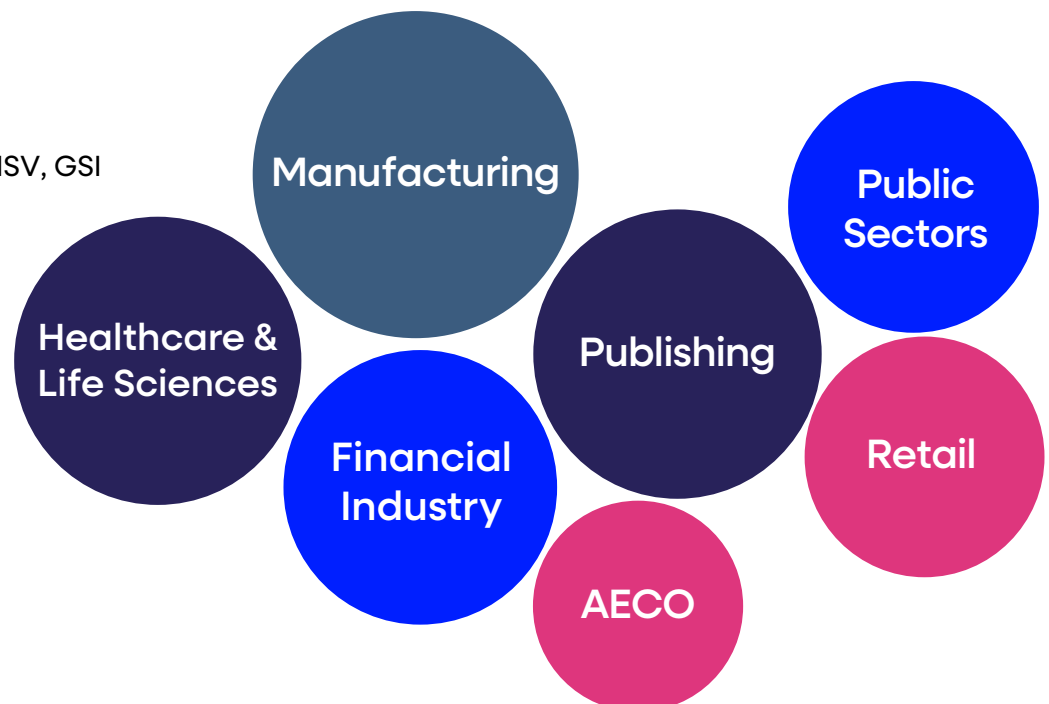

a GRAPHWISE product

a Middleware for Knowledge Graph editing, Domain or concept modeling, GraphRAG, Text analytics Services, Corpus and Metadata management, Domain and Knowledge Models

Key customers and Partners

200 +customers

Rich partner ecosystem,
including 30+ complementary ISV, GSI

Company Size & Key Expertise

200
+staff

Software and Data Engineers

Data Scientists and Machine Learning Experts

Solution Architects

Taxonomy and Ontology Engineers

Knowledge Graph Specialists

Text analytics experts

Product Managers

Domain experts
